

I feel that the ability to provide local information should be part of the services provided XM Radio. Just like satellite television having the right to provide local content to those that can't receive local content, XM is providing a service that is not available except in very limited form otherwise. No other local media format has attempted to provide the same level of service that XM is providing. At the moment, local information for my area is not part of the XM service yet but I hope that it will be provided in the future. I support this venture by XM and I hope that you will also.
